**Join Hands To Save Our Mother Earth**

# Objectives of Eco Club

1. Motivate the students to keep their surroundings green and clean by undertaking plantation of trees.
2. Promote ethos of conservation of water by minimizing the use of water.
3. Motivate students to imbibe habits and life style for minimum waste generation, source separation of waste and disposing the waste to the nearest storage point.
4. Educate students to create awareness amongst public and sanitary workers, so as to stop the indiscriminate burning of waste which causes respiratory diseases.
5. Sensitize the students to minimize the use of plastic bags, not to throw them in public places as they choke drains and sewers, cause water logging and provide breeding ground for mosquitoes.
6. Organize tree plantation programmes, awareness programmes such as Quiz, essay writing, painting competitions, rallies, nukkad natak etc. regarding various environmental issues and educate children about re-use of waste material & preparation of products out of waste.
7. Organize Nature Trail in Wild Life Sanctuaries/Parks/Forest areas to know about the Bio-diversity.

**ENVIRONMENT CONSERVATION**  
For the sake of your health, nature and the world

As a remedy to the current crisis in the world regarding environment (global warming), think about the following steps and pledge that you will integrate them in college/family and in your personal life

**WATER**

Only twenty percent of the Water in the country is potable (safe for drinking). The loss with water is more of wasteful expenditure rather than scarcity of water.

1. Fill up only half a glass when you offer water for drinking. If that is also not used fully, collect this in a vessel and use it for other work.
2. Use one bucket water for bathing. Fancy showers and fountains lead to waste of precious water.
3. In public programmes, use glasses instead of bottles for water.
4. Make arrangements for recycling of used water. For example, water used for washing vegetables at home can be collected and used for watering plants.
5. In public gatherings, collect and reuse left over water.
6. Install rain water harvesting systems in your house and work-place.

**ELECTRICITY**

1. Use electric appliances when required. Switch them off when not needed.
2. Use Air-conditioners only if unavoidable and absolutely necessary.

**PLASTICS**

1. Don't use plastic bottles to store water.
2. Use copper or steel jugs to store water in the fridge.
3. Use jute/burlap bags for shopping.
4. Avoid using plastic or thermocol plates and glasses for functions.
5. Avoid using polythene bags for disposal of garbage. Animals especially cows, can choke to death on polythene bags.

**SUGGESTIONS**

1. Keep water and grains for birds in your house, college and place of work.
2. Plant trees and take care of them.
3. Avoid consuming fast food and served drinks. Avoid stocking these in canteens.
4. Avoid bouquets and garlands for guests in functions.
5. Start an eco-environment club in college.
6. Do not waste food.

Let us come together to fulfill our duty to save Mother Earth from pollution by saving water, electricity and food grains.

"Swami Vivekananda had said that one grain of rice wasted by one person will add up to a quintal wasted. Thousands of poor can be fed if this wastage is curtailed."
