

## **Slogan competition on Wildlife conservation**

Wildlife plays an important role in balancing the environment. Wildlife provides a stability to different processes of the nature. Wildlife and nature have been largely associated with humans for emotional and social reasons. The importance of wildlife can be categorized as ecological, economic and investigatory importance as well as conservation of biological diversities etc.

The conservation of wildlife is necessary for prevention of drought, new deserts, fires as well as flood. Also, this conservation ensures that the upcoming generations of human and wildlife will be surrounded by nature thereby loving it and understanding the significance of wildlife. Also, wildlife acts as a gene pool for various resistant strains of pests causing the diseases.

Eco and Energy Conservation Club of Aggarwal College Ballabgarh organized a “Slogan Writing Competition” on February 15th, 2023 in college campus to promote the importance of “Conservation of Wild Life” to the students. The topic for this Competition was “Wildlife Conservation”. This event was organized under the directions of Principal Dr. Krishan Kant.

The event was coordinated by Eco and Energy Conservation Team, Dr. Sanjeev Gupta (Convener), Dr. Rekha Sain (Coordinator) and Ms. Mohini Verma (Coordinator).

As part of the world’s ecosystems, wildlife provides balance and stability to nature’s processes. The goal of wildlife conservation is to ensure the survival of these species, and to educate people on living sustainably with other species. Wildlife Conservation Maintains Natural Habitat and the food Chain.

This all was the purpose to organize such events so that our youth will aware about it.
